Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claim 1 is rejected under 35 U.S.C. 102 (b) as being anticipated by Olivo (Patent Number 5,233,831).

Regarding claim 1, Olivo discloses a exhaust emission control system (10) for an engine, comprising an exhaust emission control catalyst (e.g. 12, 14, 112, 114) disposed in an exhaust muffler (10) whose inside is divided into a plurality of chambers (e.g. 24, 32), wherein at least a portion of the inside of the exhaust muffler is divided into a first chamber for converting mainly NO_x (e.g. 12, 112) in exhaust gas and a second chamber (e.g. 14, 114) for converting HC and CO in the exhaust gas, and is provided with a partition wall having a conduit for guiding the exhaust gas from the first chamber to the second chamber, and wherein the exhaust muffler comprises: an exhaust gas inlet (e.g. 11, 111) for introducing the exhaust gas into the first

Art Unit: 3748

chamber; an external-air suction means (e.g. 36, 40, 42, 136) for sucking external air into the second chamber; and a discharge pipe (e.g. 50, 150) for discharging the external air and the exhaust gas flowing through the second chamber (e.g. See col. 5, lines 3-67; col. 6, lines 1-31).

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of five patents:

Lane et al. (Pat. No. 5611198), Scheitlin et al. (Pat. No. 4049388), Abbott (Pat. No. 5055274), Masuda et al. (Pat. No. 5738184), and Rusch (Pat. No. 6442933) all disclose an exhaust gas purification for use with an internal combustion engine.
